

WATER SPOT REMOVER

Application and Specifications

Product Information

Nasiol Water Spot Remover is a ready-to-use cleaner which is formulated to remove water spotting, salt deposits, hard mineral deposits and surface acid rain from chrome, all painted surfaces, glasses, metal and matte surfaces. Nasiol Water Spot Remover will quickly and easily remove stubborn hard water spots, stains and surface acid rain contamination with its mildly acidic formula.

Instructions

- Surfaces should be free of any dust, dirt and other contamination.
- Before using, shake the bottle very well.
- Spray the product on the spotted surface.
- Then wipe with microfiber cloth and do not let leave residue behind.
- If necessary allow it to dwell for 1-3 minutes.
- Do not let it dry on surfaces.
- Wash and rinse the vehicle to remove remaining product residue.

Application Tips

The product is ready for use, apply without dilution. A second application may be needed for more stubborn water spots.

Specifications

Packaging	500 mL
Appearance	Off-White-Translucent
Consumption per Unit Area	10-15 mL/m ²
Density @23°C	1.03 g/cm ³
pH Value	2.5-3.5
Application Temperature	5°C-30°C (≤50%RH)
